SUMMARY

Senior Frontend Developer with 12+ years of experience specializing in bridging the gap between legacy institutional stability and modern frontend performance. Expert in building high-trust, accessible (WCAG 2.1 AA) fintech solutions and enterprise platforms. Currently spearheading a "Modern Lab" initiative to integrate Next.js, React, and TypeScript into large-scale enterprise environments to deliver the next generation of performant web applications.

TECHNOLOGY SKILLS

Frameworks & Libraries: React, Next.js, TypeScript, JavaScript (ES6+), Bootstrap, Tailwind CSS.

Accessibility & Compliance: WCAG 2.1 AA Standards, WAI-ARIA, Accessibility Auditing.

Enterprise CMS: DotNetNuke (DNN) Ecosystem.

Tools & Workflow: Git, GitHub, AI-Augmented Development, Adobe XD/Photoshop, UI/UX Best Practices.

Analytics: Google Analytics, Performance Optimization, SEO.

PROFESSIONAL EXPERIENCE

FIS (Fidelity National Information Services) | St. Petersburg, FL **Senior Frontend Developer** | February 2012 – Present

- **Platform Launch & Scale:** Spearheaded the development and launch of 50+ responsive web platforms for banks and credit unions nationwide, improving digital experiences for hundreds of thousands of end users.

- **Accessibility Leadership:** Enforced strict WCAG 2.1 AA compliance across all client deployments, significantly reducing legal exposure and broadening market reach for regulated financial institutions.
- **Architecture & Modernization:** Translated complex client requirements into scalable frontend architectures using DNN, Bootstrap, and custom JavaScript/CSS to modernize financial interfaces.
- **Production Excellence:** Diagnosed and resolved critical production issues across a high-volume portfolio, minimizing downtime and eliminating legacy support backlogs via a same-day resolution workflow.
- **Cross-Functional Collaboration:** Partnered with design, product, and backend teams to deliver polished, on-brand digital banking experiences under rigorous financial sector deadlines.

Account Manager / Product Support | November 2006 – January 2012

- Managed technical relationships with 50+ financial institutions across online banking, mobile platforms, and cash management.
- Served as the primary technical liaison between clients and internal product teams to resolve escalations for regulated applications.

TECHNICAL PROJECTS

Modern Lab & Personal Development

- React App Ecosystem: Built functional web applications (Calorie Counter, Travel Itinerary) implementing advanced state management and CRUD operations.
 - Modern UI Development: Developed mobile-first interfaces using React and Tailwind CSS, focusing on performance and clean code.
 - Open Source: Managed 10+ GitHub repositories using structured version control and modern deployment workflows.
-
